Relevant Experience

Studio Developer @ Praxis Kreatif Lab
April 2021 - Present

- Receive raw ideas from clients for the development of applications needed by these clients
- Work with the team to pour raw ideas from clients into application requirements, such as mockups, database designs, JSON specifications, and others needed to create an application
- Convert application requirements to code, and as a front end developer, I am responsible for creating a website or mobile application using react or react native expo for mobile application needs

### FE Developer @ Cronos
July - December 2021

- Involved in scrum team as front end developer, as well as communicating with scrum master, project manager, also collaborating with back end developer on a daily basis
- Never loose and always use CI/CD in every code integration to the server, which will be checked by the scrum master and tester before being shown to stakeholders
- Presenting what features have been worked on with stakeholders every weekend, so stakeholders know whether these features have been fixed or still need improvement
